SUMMARY

Objective

You will be painting using acrylics, an object/subject of your choosing broken down into geometrics.

Steps

1. Choose an image from the internet, or magazine (people, animals, landscapes, objects etc.)
2. Roughly draw this image in your sketchbook using a full page
3. As shown by the teacher, break down your image into fleet geometric shapes
4. Use a ruler and a sharp pencil to darken the straight lines you used to create a geometric object/subject
5. Create a colour scheme for you piece using pencil crayons
6. Copy this design onto a canvas **lightly** with pencil (if you have to use sticky tack to lift some of the pencil lines and make them lighter before painting)
7. Paint flat colour inside each shape, cover all pencil lines
